

#### **Bob Wiltshire**

## **Cryo Storage Solutions**

Bob Wiltshire spent most of his working life at the University of Bristol, where he held the position of Cryogenics and Technical Research Manager. Bob has a particular interest in health and safety training for cryogenics, helping to keep students and staff safe whilst using liquid gases.

Bob's health and safety training session is aimed at users of Dewars and vessels. It will teach you some of the common mistakes and unsafe working practices, and allow you, your colleagues, and students to work more safely using liquid gases.

#### **Catherine Davidge**

#### **University of Manchester**

Catherine's 25-year technical career at the University of Manchester began as an 18-year-old Trainee Technician in the Department of Child Health. From there she moved to the Department of Physiology progressing to the Senior Technician in the renal and circadian rhythm research groups. Her technical career concluded as the Technical Manager and Safety Advisor for the Research Division of Physiology, Pharmacology and Toxicology.

Wanting a new challenge Catherine applied for a newly created role of University Safety Coordinator in Safety Services, where she liaises primarily with the Faculty of Science and Engineering. Catherine is a Chartered Safety Practitioner, and Fellow of the Institute of Safety in Technology and Research. She has delivered safety-related training for staff and students and her working philosophy is 'Yes, we can do it, safely!'

#### **Chris Snowden-Smith**

## **Transpennine STEM Ambassador Hub**

Chris Snowden-Smith is the lead for the Transpennine STEM Ambassador Hub, which encompasses Greater Manchester, West Yorkshire and North Yorkshire. The Hub is based at the Science and Industry Museum (Manchester), National Science and Media Museum (Bradford) and National Railway Museum (York) and works with schools, communities, businesses and volunteers across the region.

#### **Dr Clare Dean**

## **Manchester Metropolitan University**

Dr Clare Dean is a Technical Officer at Manchester Metropolitan University, specialising in plant and animal ecology. She has spent many years wading through ponds, sitting in bogs and roaming windy moors, all in the name of science.

Sarah Baggley HEaTED

Sarah Baggley is the Operations and Engagement Manager at HEaTED. Sarah is responsible for managing day-to-day operations and has a demonstrated commitment to facilitating member engagement.

Sarah has worked within the Higher Education sector for eight years and has expertise in strategic leadership, client support and financial management. She is passionate about professional development and its importance to both individuals and their organisation.

# Jared Carnie National Technician Development Centre

Jared Carnie is the Operations Manager and Skills Survey Lead at the National Technician Development Centre (NTDC). He has overseen the development and implementation of the NTDC's Technician Survey at organisations around the UK and beyond.

## **Rachael Peters**

### **Manchester Metropolitan University**

Rachael is a Technical Officer at Manchester Metropolitan University specialising in histology, microscopy, and haematology. Their main role is supporting the research laboratories as well as undergraduate and postgraduate project students. They play a key role in managing the chemical inventory and laboratory information management system at Manchester Met, including facilitating the roll out of the software to the entire Faculty of Science and Engineering and aiding the development of custom CoSHH and Risk Assessment forms. They are also an AFHEA, a Member of the Royal Microscopy Society and working towards Professional Registration as a Chartered Scientist.

**Robert Crapnell** 

#### **Manchester Metropolitan University**

Robert is currently a Technical Specialist at Manchester Metropolitan University (MMU) working on the Interreg funded project TRANSFORM-CE, which looks to produce valuable additive manufacturing feedstocks from municipal waste sources. He completed his MChem and PhD in Chemistry and Electrochemistry at the University of Hull, under the supervision of Prof. Jay Wadhawan, followed by two PDRA posts at MMU under the supervision of Dr Marloes Peeters and Prof. Craig Banks.

**Richard Saldanha** 

**Oxquant** 

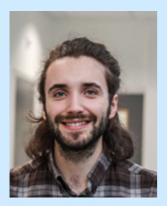

Richard is involved in providing expertise and advice on artificial intelligence, machine learning and data science through consultant Oxquant. Richard is also a Visiting Lecturer at Queen Mary University of London where he teaches statistical machine learning as part of a master's degree programme in economics and finance.

Kanupriya Bhargava

**Swiss Re** 

Kanupriya is an Associate in the Portfolio Steering team at Swiss Re, a world renowned reinsurance/insurance group. She is responsible for developing and designing analytical solutions and initiatives to generate portfolio insights supporting the Property and Special Lines Insurance unit of the company.

**Andrew Blance** 

**Waterstons** 

Andrew is a Data Scientist at Waterstons, a North-East-based technology consultancy firm. Andrew has taught courses about deep learning and statistics throughout the UK and Ireland, showing people in industry and academia how to use advanced data science methods both practically and effectively in their work.

Alicia Colson

**Freelance** 

Freelance archaeologist and ethnohistorian interested in the interplay between digital humanities, pattern matching and machine learning (AI) particularly using images, often created by indigenous peoples, and texts. Alicia holds a PhD in Archaeology from McGill University, Canada.

## **Murray McMonies**

**Royal Navy** 

Murray McMonies is a Marine and Nuclear Engineer by profession. He serves as a Commissioned Officer in the Submarine Service of the Royal Navy. Murray completed a Post Graduate Diploma in Nuclear Reactor Technology at Cranfield University in 2016. He also holds an MSc from the University of Portsmouth which formed the basis of his Al research.

## Marie Oldfield

**Oldfield Consultancy** 

Marie is the Director of Oldfield Consultancy, which aims to solve some of the most complex problems using AI and data analytics. Marie is heavily involved in AI and ethics and is an Expert Fellow for Sprite+, Chair of the IST's AI SIG and Member of the College of Peer Reviewers for Rephrain. Marie submitted her doctoral thesis on AI earlier this year and will be defending it shortly.

**Murray Webster** 

**University of Gothenburg** 

Murray is currently involved in a research project at the Centre for European Research at the University of Gothenburg, Sweden. He plans to pursue doctoral research in large-scale computational systems and structures of socio-political governance. Murray holds a first-class honours degree in English Literature and Philosophy from the University of Glasgow. He subsequently studied mathematical logic at the University of Gothenburg for a year.

**James Fox** 

**University of York** 

James Fox is the Deputy Operations Manager in the Biology department at the University of York, a post he has held since 2021. Prior to this he was a laboratory manager, technician and postdoctoral researcher with a keen interest in recycling both in and out of work! James is a member of the IST and a Chartered Scientist.

#### **Evan Wilson**

#### **Manchester Metropolitan University**

Evan Wilson is a Technical Specialist within the School of Digital Arts at Manchester Metropolitan University (MMU). His background is in music composition, audio production, photography, camera operation, directing and video post-production. During his time at MMU he has established Art School Live: a project focussed on bringing live music on to the campus to give students the experience of running public-facing hybrid events to enhance their skills and employability.

### Sam Heitzman

## **Manchester Metropolitan University**

Sam Heitzman is a Technical Specialist within the School of Digital Arts at Manchester Metropolitan University with a background in audio production, video post-production and live technologies. His work focusses on live events and collaborating with artists and practitioners from different disciplines.

Sam's primary interest is live broadcast technologies. He is the co-creator of the successful Manchester Met project Art School Live where students are guided through the process of creating a live cultural event in the heart of Manchester. Alongside this he also runs the Man Met Matchday Live project from the university's Platt Lane campus where students work together to stream sporting events.

#### **James Smith**

#### The Open University

After being awarded his PhD in 2002, James spent some time in industry working as a systems engineer before then joining The Open University (OU) as a Curriculum Manager in the School of Physical Sciences. He was senior manager for the OpenSTEM Labs and has recently been appointed to lead some of The OU's innovative augmented and extended reality initiatives.

John-Paul Ashton-Kinlin

#### **Pro Vital Medical Services Ltd**

John-Paul was a Technician at Microbiological Validation Services Ltd and the University of Sheffield collectively for around ten years before moving into Marketing and Project Management at the Institute of Science & Technology and the National Technician Development Centre for 5-6 years. John-Paul is now Director of an SME; Pro Vital Medical Services Limited which in five years has grown from a £0 to £500,000 annual turnover, with plans in place already for future growth and expansion.

John-Paul's experience in consultancy and special advisory roles helped him to side step but the very foundation that everything was built on was forged from his work as a Technician and his wonderful technical colleagues.

Joan Ward IST

CJoan is currently the Deputy Chair of the IST.

Prior to her time working within the IST she spent >30 years at University of Manchester, working her way up from Junior Technician to Faculty Lab Manager, after which she moved into a role as Finance and Research Grants Manager.

After operating as a consultant back at the University she setup and still runs her own consultancy company.

She remains passionate about working towards improving the opportunities for the technical workforce

#### **Margaret Ross**

**Emerita Professor of Software Quality, Solent University** 

MBE presented at Buckingham Palace, 2008 Added to Computer Weekly's "Hall of Fame" 2020 BCS Society Medal Finalist 2020 Honorary Fellow of the British Computer Society, 2007,

Award of the BCS John Ivinson Medal 2011

Honorary Degree of Doctor from Staffordshire University, 2004 Freeman of the City of London, 2001

Liveryman of the Worshipful Company of Chartered Engineers, 2001 Identified by Computer Weekly in 2016 as one of the top "50 Most Influential Women in UK IT",

and in 2017 and also in 2019 in the longer list by Computer Weekly as one of the of the top "Most Influential Women in UK IT" .......to name but a few!

**Kara McLouglin** 

**Science Museum** 

Currently working as Production Coordinator at the Science Museum for the upcoming Technicians Gallery, started in Jan 2022. Previously worked as Project Officer with National Historic Ships UK which is a government funded, independent organisation which gives objective advice to UK governments and local authorities, funding bodies, and the historic ships sector on all matters relating to historic vessels in the UK

Workshop 1

## **Technicians Gallery**

#### Science Museum

Kara McLoughlin

An update from the staff at the Science Museum about the progress of the exciting new Technicians Gallery. Opening in autumn 2022, this free interactive gallery aimed at 11 to 16-year-olds seeks to change perceptions of technical careers and inspire tomorrow's technicians.

Technicians: The David Sainsbury Gallery will provide unique access into the world of technicians, with visitors able to try out the tasks technicians perform, explore their remarkable stories and meet real-life technicians in the gallery.

Workshop 2

# Digital skills: Introducing Python for non specialists

Oxquant/ Swiss Re/ Waterstons

Richard Saldanha, Kanupriya Bhargava, Andrew Blance

Python is one of today's most popular programming languages for implementing AI/ML tasks. Its extensive set of libraries for advanced scientific computing dramatically reduces development time for methods such as natural language processing, computer vision and reinforcement learning. Come and learn more about this Open Source language in a series of easily accessible short presentations from leading IST Pythonistas.

Workshop 3

# **Enhancing student** employability using live briefs University

Manchester Metropolitan

Evan Wilson Sam Heitzman

How specialist technical staff at Manchester Metropolitan University use live cultural and sporting events to enhance student employability.

Workshop 4

# **Enhancing Health and Safety** Manchester Metropolitan using Technology

University

**Rachael Peters** 

LabCup is a chemical inventory and laboratory information management system that plays a key role in facilitating health and safety management at Manchester Met. Rachael will be discussing the role LabCup plays in this and how similar technologies could be used to enhance health and safety processes within other laboratories and workshops. They will also talk about the journey to develop the system from a small-scale trial in a few laboratories to an essential system for everyone who works in the Faculty of Science and Engineering.

Workshop 5

# Cryogenic storage and the safe Cryo Storage use of cryogenic fluids

**Bob Wiltshire** 

This H&S training session on the safe use of cryogenic fluids is aimed at users of Dewars and vessels. It will teach you some of the common mistakes and unsafe working practices, and allow you, your colleagues, and students to work more safely using liquid gases.

Workshop 6

Becoming a STEM
Ambassador and how it could help your career

Transpennine STEM Ambassador Hub

Chris Snowden-Smith

In this interactive session find out about STEM Ambassadors, a national volunteering programme connecting STEM professionals with children and young people with the aim of inspiring the next generation and how to sign up. The session will also cover how being a STEM Ambassador can help your career, through developing skills and building your CV.

Workshop 7

Supporting sustainability and the key role of technical staff

Manchester Metropolitan University Dr Clare Dean, Rachael Peters, Robert Crapnell

Technical services play a key role in supporting our universities to achieve their sustainability goals. Bobby will be talking about his work related to transforming municipal waste streams into useful products, Clare will be highlighting how she supports research relating to environmental assessment including carbon measurement, and Rachael will be showing how using a laboratory information management system can improve sustainable working practices in laboratories.

Workshop 8

**Women in Tech Group** 

IST

Joan Ward, Margaret Ross, Marie Oldfield

An update from the IST's Women in Tech network group - what they have been doing and a discussion on what the group should be doing going forward.

Workshop 9

The OpenSTEM Labs: An Internet of Labratory Things

The Open University

James Smith

The OpenSTEM Labs challenge the traditional STEM teaching model of students and tutors being collocated in a lab during 'office hours'. The laboratory connects students to instrumentation, data and equipment for practical enquiries over the internet, where distance is no longer a barrier and where access can be available 24 hours a day. The experiences a student might encounter range from data driven interactive experiments through to connecting with real, high grade, equipment. There are even two telescopes sited in an international observatory complex on Tenerife.

Workshop 10

The asset resale service for universities

Michael McLeod

UniGreen

The start-up, UniGreenScheme is a service to collect, store and sell unwanted equipment for universities. It has re homed over 700,000kg of equipment, saving the sector over £2.4m versus disposal. UniGreenScheme recently started working with the University of York and this talk will showcase some examples of resale at York and other universities

Workshop 11

**Unlock the Technician Survey** data and Discover Education **Development for Technical** Staff at HEaTED

National Technician **Development Centre/ HEaTED** 

Jared Carnie, Sarah Baggley

This session will give an update on the NTDC Technician Survey, including recent activity and how to unlock the potential of the data, and also explain HEaTED's work to support and promote the skills and roles of technical staff. There will also be an opportunity to hear about networks and career development opportunities open to technicians and experiences and success from HEaTED members.

Workshop 12

**Professional Registration**what's in it for me?

IST

Michelle Jackson, Laurence Dawkins-Hall

Michelle and Laurence are the Registrar and Assistant Registrar for the IST. They will explain the basis of professional registration and will discuss the merits and benefits to becoming professionally registered. They will also look at what registrants see as the pros and cons of undertaking the application process and securing and maintaining registration.

Workshop 13

Introducing the IST's Artificial **Intelligence Specialist Interest Group**  IST

Alicia Colson, Murray McMonies, Marie Oldfield, Murray Webster, Andrew Blance, Richard Saldanha

The lack of knowledge, and by implication transparency and accountability, in AI can be worrying. More should be done to ensure that AI is understood, its benefits harvested more readily and any risks mitigated. The IST's AI SIG aims to explain and where necessary challenge the development of new such technologies where they relate to human-computer interaction. Come and learn more about what we do. You might even consider joining our group.

Workshop 14

**Laboratory Plastic and Sharp Bin Recycling Schemes** 

University of York

James Fox

This workshop will outline how the Department of Biology at the University of York is working with its waste contractors to recycle laboratory plastics (since 2018) and, in the past few months, how it has implemented a sector leading scheme to reuse sharps bins.

Workshop 15

Laboratory planning and design: University of Manchester putting safety first?

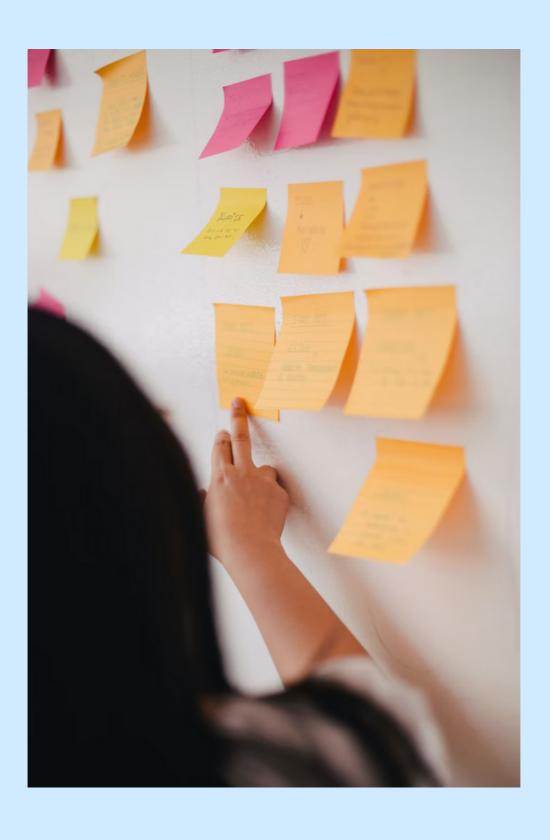

Catherine Davidge

At some point in your technical career you may get involved in facilities refurbishment, or be asked to help accommodate a new researcher joining your group. During this workshop we will consider when to focus on the safety aspects of these tasks and get some hands on planning experience during a practical exercise.

Workshop 17 Pro Vital Medical John-Paul Ashton-Kinlin Services Ltd

## How to be transferable

Career Development is something we are all familiar with, but due to the pandemic it is becoming more and more essential to be able to use your pre-existing skills and shift them into a brand new dynamic for success. This talk will give a small insight into case studies, examples and top tips to give you the edge on maximising your true career potential. You are never 'Just a Technician'!

Demo 1

Film: Easy when you know how

Erik Olafsen

School of Arts & Creative Technologies

The secret to capturing good video: Setup and use of a high-end video camera.

Demo 2

Mechanical Research Workshop

Mark Bentley

Biology

A presentation of the bespoke instruments, from large scale GPS controlled gaseous collectors to minute frames for microscopic analysis that we have built in our workshop

Demo 3

Measure the speed of light

**Andy Firth** 

School of Physics, Engineering & Technologyk

A practical physics taster session

Demo 4

Deliver Clearer Results Through Accessibility

Richard Hagan

Archaeology

A practical physics taster session

Demo 5

Green Impact and the Sustainable Laboratory

Rebecca Sutton/Dave Hay

E&G

A practical physics taster session

Demo 6

Spinner construction lab

Andy White

School of Physics, Engineering & Technology

Partake in a practical lab session to solder electronic components into a PCB in order to manufacture a working gift to take away with you

# Tour 1 Music Facility

School of Arts & Creative Technologies

Ben Eyes

Visit the music department, housing one of the best auditoriums for acoustics in the North of England, with a newly rebuilt pipe organ and two Steinway pianos, surrounded by specialist teaching and practice rooms.

#### Tour 2

**Engineering Manufactoring Facility** 

School of Physics, Engineering & Technology

Andy White

Visit the new Engineering Manufacturing Facility, renewables test bed lab and Engineering teaching labs

## Tour 3

# Horticulture Research Facility

Biology Department

Jason Daff

Visit the glasshouses and controlled environments for growing plant material for research into bio renewables and fighting disease. Learn about the roles of the technical team who provide this service.

#### Tour 4

Institute for Safe Autonomy

School of Physics, Engineering & Technology

James Hilder

Robotics, autonomous systems and AI have the potential to transform the way we live, travel & work. Visit our brand new flagship research facility before it opens officially this autumn.
